TREATMENT CARTRIDGES

LA BIG 
granular activated
carbon (GAC)

- reduction of
- chlorine / chloramine
 - bad taste / odour
 - volatile organic compounds
 - pesticides

LA Ag BIG 
with silver impregnated
coconut GAC

- reduction of
- chlorine / chloramine
 - bad taste / odour
 - volatile organic compounds
 - pesticides

HA BIG 
polyphosphate
crystals

- reduction of
- anti-scale
 - anti-corrosion

LA HA BIG **One of a Kind** **2 STAGE FILTRATION CARTRIDGE**

granular activated carbon + polyphosphate crystals

- reduction of
- chlorine / chloramine - bad taste / odour
 - volatile organic compounds - pesticides
 - anti-scale - anti-corrosion

QA AF BIG

strong base anion exchange resin

- reduction of nitrates

CM BIG

mineralizing calcite

- water mineralization after reverse osmosis treatment

QA CF BIG

strong acid cation exchange resin

- water softening

CN BIG

neutralizing calcite

- neutralization of acid condensate produced by condensing boilers

QA LM BIG

mixed bed cation/anion exchange resin

- anti-scale
- total demineralization

P BIG

Refillable with water treatment media available:

- granular activated carbon
- polyphosphate crystals
- ion exchange resins
- remineralizing calcite
- neutralizing calcite
