

RAH BIG *Stainless steel net for HYDRA BIG series filters*

RAH BIG washable cartridges consist of a reinforced polypropylene frame (armature) and an AISI 316 stainless steel net, and are designed exclusively for HYDRA BIG series filters. The cartridges are manufactured without glue and sealants, the nets are included during the frame molding. Thanks to the self-cleaning system of filter backwashing the filter net is easy to wash, the materials are strong and durable developing a high resistance to collapse. Reinforced structure at the base to withstand higher flow rates.

MAX WORKING TEMPERATURE
45°C (113°F)
 MIN WORKING TEMPERATURE
4°C (39,2°F)

COLDWATER

Sediment filtration.
Average life-span: 24/36 months.
Maintenance: periodically perform a cartridge back wash in counter-current.

TECHNICAL SPECIFICATIONS

Selected raw materials, suitable for drinking water.
 Filter medium: stainless steel AISI 316.
 Armouring and end cap: polypropylene.
 Flat seals: SEBS with antimicrobial technology.

Tests carried on **RAH BIG** cartridge. Testing mode: 20°C, 3 BAR
